

Engage, Connect, Interact...Sustain Learning:

A Seminar about how to GET and KEEP kids engaged.

Take a chance, make a change... “set a hook that will last all year”.

- What if everything IS connected to everything?
- Use the proper tools for the job, whiteboards, blackboards, overheads...use them to engage, rather than to hypnotize.
- No matter how well planned, how interesting, stimulating, colorful or relevant the lesson, if the teacher does all the interacting with the material, the teacher's -- not the students -- brain will grow.
- Interdependence, Accountability, Time on Task, Equal Opportunities increase Student Achievement.
- Focus learning by activating prior knowledge. Activate sensory receptors: sight, sound, smell, taste, touch. Tap into students' emotions.

SOLUTIONS: *KIND* to KIDS & TEACHER FRIENDLY
Our Professional Development meets NCLB criteria.
