

Metacognition, Reading Comprehension, And Raising Test Scores

Reading Comprehension is key for Raising Test Scores. Being aware of one's thinking during the reading process is a crucial, and frequently overlooked component of teaching reading. Metacognition encourages the construction of knowledge, promotes curiosity, and helps build upon interests and prior experiences.

Learn to teach your students to:

- Clarify the purpose of reading
- activate background knowledge
- make inferences from text
- predict
- generate questions
- summarize events
- clarify details
